2024 Becky Burress Unsung Hero Award
Awarded to: Linda Trevino

Below is the biography submitted by the awardee.

Linda Trevino: “A nationally registered medical assistant multi-tech, Linda Trevino has 38 years of experience in the Urgent Care and occupational medicine space. She graduated in 1988 from Texal Tech for Medical Assisting as salutatorian and her love of medicine only grew from there while working at a gynecologist clinic. Then, in 1991, went to work in Urgent Care. In 1998 Linda was hired for an Urgent Care that offered occupational medicine. That is where her love for occupational medicine grew. In 2001 Linda completed the Non-Certified Technician program to add to her skills and become an x-ray Tech.

She is known for going the extra mile with her compassionate care of both patients and co-workers. Examples include: purchasing a cell phone for one employee to make sure she could communicate with her job and her son's daycare. Another, Linda had her husband come to the clinic after closing for a staff member who had a flat tire because 'it was too dark and we need to make sure they get home safely'. She also organized 'Operation Santa' with the clinic team and donated toys and food to the family personally. For patients, she is most diligent in double checking labs and tests for pre-hires and has occasionally, offered to pay copays for really sick patients.

Linda's true passion is for Urgent Care which began with her transition to an NCT multi-tech. Linda has been a full time Medical Assistant Multi Tech for HCA Care Now for the last 8 eight years. She has been instrumental in developing and maintaining our occupational medicine and employee paid services for Care Now River Oaks. Most recently, she has welcomed a new grandbaby and is juggling a wonderful family and work life.”
