# RECOGNITION

## Organizational Accreditation

The Accreditation program advances an Urgent Care organization to the highest level of distinction in patient care through safety, quality and scope of services. It also helps Urgent Care centers and clinics stay in-network with select payers.

UCA national membership dues are discounted by 25% for organizations who have an active UCA Accreditation. Only organizations that are UCA Accredited receive the discount; does not apply to individual memberships.

## Certification

CUC designation tells payers an Urgent Care center's scope of practice is consistent with a set of UCA criteria. CUC centers have an edge in marketing their level of services and curbing confusion with other kinds of providers. Members receive Certification discount. Learn more about [Certification fees](#).

## Advocacy

We have one objective: Improved reimbursement for Urgent Care. We actively work to educate members of Congress, state and local legislators and federal regulatory agencies about Urgent Care issues. View more [information and Advocacy Updates](#).
